## INTRODUCTION

The purpose of this document is to explain how to operate the BACnet touch screen, so a user may perform the following functions

- A) Adjust temperature set point
- B) Start the AC unit
- C) Adjust / edit schedule

The BACnet touch screen is located on the door of the control panel which is found in the plant room on the top floor.

**Control Works QLD Pty Ltd**      **ABN: 39 283 019 503**

PO Box 1384, Toombul, Queensland 4012 Australia

Telephone +61 7 3256 8606 Fax +61 7 3256 8606

## SET POINT PAGE

From this page the user can adjust the set point and please note that you MUST be logged in with appropriate privileges.

To navigate use the left / right arrows to place the curser under the required units you wish to change, then use the up / down arrows to increase or decrease the selected units. Once happy, select the tick in the middle and you will be presented with "operation successful" splash screen, before being redirected to the original page.
